**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 64,65,90,91, drawn to a mirror with specifics of the step-down converter, classified in class 359, subclass 603.
- II. Claims 67,68,93,94, drawn to a mirror with specifics of the impedance device, classified in class 359, subclass 603.
- III. Claims 69,70,95,96, drawn to a mirror with specifics of the voltage potential, classified in class 359, subclass 603.
- IV. Claims 71-78,97-104, drawn to a mirror with specifics of the electronic switch, classified in class 359, subclass 603.
- V. Claims 79,105, drawn to a mirror including another impedance device, classified in class 359, subclass 603.
- VI. Claims 80-83,106-109, drawn to a mirror including another electronic switch, classified in class 359, subclass 603.

Art Unit: 2872

VII. Claims 86-89,111-113, drawn to a mirror with specifics of the drive circuit, classified in class 359, subclass 603.

Note: claims 84,85,110 are not considered to be distinct from any of the inventions and will be examined with an elected invention.

2. Claims 63 and 89 link(s) inventions I-VII. Further, claims 66 and 92 link inventions II-VI. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s). Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer

Art Unit: 2872

applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I-VII are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the claims of each of the inventions evidence that the combination does not require the separately claimed particulars of the other inventions.

Further, each invention has utility separate from the other inventions, e.g. a mirror device may be associated with a particular voltage potential (invention III) while not including an additional electronic switch (invention VI). See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be

Art Unit: 2872

examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
